WHO SAYS THE GRASS IS ALWAYS **GREENER?** ON THE OTHER SIDE ?

Have the most beautiful lawn on the block! Keep your lawn healthy, green and vibrant all year long without lifting a finger. Call Grass Roots Lawn and Garden Care, the most trusted name in lawn service since 1987.

With our Complete Care service we'll seed, irrigate and fertilize your lawn, and mow and weed year round. All at a reasonable price! And we are environmentally friendly and 100% organic!

Be the envy of your entire neighborhood. Increase your home's value and curb appeal.

ABOUT US

In 1987, Aaron, our founder, began a lawn mowing service out of his home in Annapolis, Maryland. The operation quickly expanded to include weeding, seeding and irrigation, providing a complete lawn care solution. Soon after, we began to recognize the need to be environmentally friendly, so we developed organic methods to get the most out of your lawn, with minimal impact on the environment.

At Grass Roots, we understand that your time is important to you, and you would rather spend it enjoying your beautiful lawn instead of caring for it. Therefore, we strive to give you the lawn you have always wanted.

SERVICES

STARTING A NEW LAWN

We start by installing our irrigation and drainage system to ensure that your grass is properly watered, no matter the weather conditions. After, we prepare the soil by testing it for pH levels, nutrients and consistency, we treat it with our own EcoGrow™ organic turf fertilization products. Finally, we choose the appropriate grass for your location, soil conditions and sun exposure.

MAINTENANCE

We offer regular maintenance services built around your schedule to promote a healthy lawn throughout the year.

These services include:

- Mowing and edging.
- Dethatching to ensure that your grass is receiving the proper amounts of water, air and nutrients.
- Organic weed removal and suppression.
- Removal of pests, including moles, voles and grubs that will damage your lawn. We use only humane methods.
- Soil aeration.
- Leaf removal.
- Prepare your lawn for the winter months to ensure your grass stays healthy year round.

We use all grass clippings and leaves to create our own unique EcoGrow™ organic compost fertilizer. Nothing goes to waste!
